The Sixth Annual Southern California Symposium

Annenberg Center @ Caltech

## on Network Economics and Game Theory

## Keynote Speakers

Markus Mobius, Microsoft Research Tim Roughgarden, Stanford

## Invited Speakers

Marina Agranov, Caltech Nageeb Ali, UCSD Siddharth Barman, Caltech Francesco Bullo, UCSB Yilmaz Kocer, USC John Ledyard, Caltech Ichiro Obara, UCLA Jong-Shi Pang, USC Georgios Piliouras, Caltech Marek Pycia, UCLA Shanghua Teng, USC Joel Watson, UCSD William Zame, UCLA This symposium will bring together students, professors, and researchers from Southern California who apply game theory to analyze, design, and assess the performance of networks with the goals of creating collaborations between researchers in Computer Science, Electrical Engineering, and Economics, and encouraging discussions regarding the benefits and limitations of game theory as a performance assessment and design tool for networks.

**Organizing Committee** Rahul Jain, USC

Attendance

John Ledyard, Caltech Katrina Ligett, Caltech Ashutosh Nayyar, USC Ichiro Obara, UCLA Mihaela van der Schaar, UCLA Adam Wierman, Caltech Simon Wilkie, USC William Zame, UCLA

is free, but registration is required. Deadline: 11/14

Sponsorship UCLA Dept. of Economics UCLA Dept. of Electrical Eng. USC Dept. of Economics USC Ming Hsieh Institute Caltech IST Caltech Linde Institute
